p>Cognitive Science studies the nature of the human mind and its interactions with the environment and other minds. It challenges our concepts of what it is to be human and what it means to be cognitive. In doing so, Cognitive Science addresses standard cognitive topics, such as sensation, perception, attention, memory, judgement and decision making, problem solving, reasoning, motor cognition ...

In *Motivation and Cognitive Control* edited by Todd Braver, excellent psychologists tackle the diverse ways in which motivation influences cognition, while in turn cognition regulates motivation. Altogether, this is a comprehensive handbook for anyone interested in motivation-cognition interactions. Kent Berridge, James Olds Collegiate Professor of Psychology and Neuroscience, University of ...
