Thomson's regenerative biology laboratory at the Morgridge Institute for Research is now seeking to understand how a cell can maintain or change identity, how a cell chooses between self-renewal and the initial decision to differentiate and how a differentiated cell with limited developmental potential can be reprogrammed to a pluripotent cell.

Thomson Lab | Morgridge Institute for Research

CCP antibodies target healthy tissues in the joints. If CCP antibodies are found in your blood, it can be a sign of rheumatoid arthritis. Rheumatoid arthritis is a progressive, autoimmune disease that causes pain, swelling, and stiffness in the joints. CCP antibodies are found in more than 75 percent of people who have rheumatoid arthritis.

Introduction to Chemistry Lab Manual Chem 1105 ACC by ...

Great Prof.! She covered all the necessary materials in the course of 7 weeks. She also gave us more practice problems to get a grasp of each chapter. Fair and respectful! Make sure to read the book and work on the problems, its gonna be an easy A. Need help from her? Just make an appt. and show up on time. Students at CCP tend to whine a lot!
