## 11 The Evolution

Chapter 11 The Origin and Evolution of Early Life. Chapter Summary  
Understanding the origin of life requires interdisciplinary

collaboration among biologists, chemists, geologists, and atmospheric scientists.

At the base of the tree of life is the last universal common ancestor (LUCA). LUCA was not a single organism, but a population of

11.1. Discovering How  
Populations Change.

Evolution by natural  
selection arises from  
three conditions:  
individuals within a  
species vary, some of  
those variations are  
heritable, and  
organisms have more  
offspring than  
resources can support.
