When the construction is dealt on a highly contaminated ground, this system of construction is a best choice. Twin Wall Technology. The twin wall technology is a hybrid solution of wall system that combines the qualities of erection speed and precast concrete with the structural integrity of in-situ concrete.

Modern Construction Methods -Details and Applications

Construction needs unification, and a construction operating system is what the industry should be looking to develop. To build the projects of the future, construction will need to connect people, technology (think: device agnostic) and software. An operating system, providing that connectivity, would remove the friction of development, data ...

Construction Executive | Welcome

Construction is a general term meaning the art and science to form objects, systems, or organizations, and comes from Latin constructio and Old French construction. To construct is the verb: the act of building, and the noun is construction: how something is built, the nature of its structure. In its most widely used context, construction covers the processes involved in delivering buildings, infrastructure and industrial facilities, and associated activities through to the end of their life. It

Construction - Wikipedia
