Duct Smoke Detector Installation Guide

Recognizing the showing off ways to get this book **duct smoke detector installation guide** is additionally useful. You have remained in right site to begin getting this info. acquire the duct smoke detector installation guide link that we find the money for here and check out the link.

You could purchase guide duct smoke detector installation guide or acquire it as soon as feasible. You could speedily download this duct smoke detector installation guide after getting deal. So, afterward you require the book swiftly, you can straight get it. It's thus completely simple and thus fats, isn't it? You have to favor to in this manner

Updated every hour with fresh content, Centsless Books provides over 30 genres of free Kindle books to choose from, and the website couldn't be easier to use.

Duct Smoke Detector Installation Guide

the installation of smoke detectors and other related requirements is intended to prevent the distribution of smoke through the supply air duct system and, preferably, to exhaust a significant quantity of smoke to the outside.

Duct Smoke Detectors - System Sensor

1. With power source de-energized and the smoke detector not installed, wire all connections per engineering drawings. Refer to the applicable figures below depending on your duct housing model number.
2. With all wiring in place, install the detector head.
3. Energize the duct detector.

1. With power source de-energized and the smoke detector not installed, wire all connections per engineering drawings. Refer to the applicable figures below depending on your duct housing model number. 2. With all wiring in place, install the detector head. 3. Energize the duct detector.

INSTALLATION INSTRUCTIONS FOR THE DUCT SMOKE DETECTOR

Before installing the duct detector, you must verify the duct air flow and velocity. The detector is designed for use in air handling systems with air velocities between 300 ft/min and 4000 ft/ min (1.5 m/s to 20.3 m/s). Check the HVAC engineering specifications to ensure the air velocity in the duct falls within these parameters.

Systems

The duct smoke detector units are designed to operate in duct widths from 6" to 10' wide with an air velocity between 500 to 4,000 feet per minute. To verify correct installation, the pressure differential between the sampling (high side) and exhaust (low side) tubes should be measured using a Magnehelic pressure gauge or equivalent.
