Value-added engineering, state-of-the-art manufacturing facility and customer service have enabled to build a niche for HRS across the globe.

### **Shell, Tube, Corrugated Tubes, Plate Heat Exchangers**

The plate heat exchanger consists of different heat transfer plates, which are sealed by gaskets, or brazed, or welded together. The heat exchanger's individual transfer plates are arranged in packages, which form flow channels through which the hot and cold media alternately flow. This enables the thermal energy to transfer from one media ...

The Na(+)-Ca(2+) exchanger is the primary mechanism by which the Ca(2+) is extruded from the cell during relaxation. In the heart, the exchanger may play a key role in digitalis action. The exchanger is the dominant mechanism in returning the cardiac myocyte to its resting state following excitation.[supplied by OMIM, Apr 2004
