June 2019 Physics Regents Answers Explained

Regents Physics - Defining Motion Distance and Displacement. An object's position refers to its location at any given point in time. If we confine our study to motion in one dimension, we can define how far an object travels from its initial position as its distance, "d." Distance, as defined by physics, is a scalar. It has a magnitude, or size, only.

Regents Physics Defining Motion

P.S./Physics-June '13 [2] Part A Answer all questions in this part. Directions (1–35): Foreach statement or question, choose the word or expression that, of those given, best completes the statement or answers the question.
